

1 Choose your lenses

Select your lens type based on your visual needs.
All lenses come with anti-reflective + anti-scratch coating as standard.

Single vision	\$75
Access/Bifocal	\$200
Multifocal	\$250

*Single vision lenses can be for either distance or reading. Access lenses are used for close and intermediate distances (computer work). Multifocals have three focal lengths - near, intermediate and distance.

2 Customize your lenses

Add on extra treatments and options to your lenses.
For example, opt for thinner lenses, blue light filter or turn them into sunglasses.

OPTION

Single Vision Custom	\$75
----------------------	------

*Single Vision Custom are recommended when your prescription is too complex for a standard lens. Our staff will advise when customized lenses are required.

THINNING

Thin	+\$50
Thinner	+\$100
Thinnest	+\$175

*Thinning of lenses is recommended when you have a stronger prescription. It makes your lenses lighter and less dense. We suggest Thin for > +/- 2, Thinner for > +/- 4, and Thinnest for > +/- 6.

TREATMENT

Blue Light	+\$25
UV Sunglasses	+\$25
Polarized	+\$75
Photochromic	+\$100

*Choose from a range of tints, coatings and other treatments for sunglasses or other types of lenses that can help with blocking UV, sun glare and blue light.

3 Choose frames

Now for the fun part - choose size (xs, s, m, l) and then create your colour story. Our frames come in modular parts so you can mix and match your colours - or choose additional parts to create multiple looks. Go wild with colour or keep them more subdued, it's up to you!
